TECHNICAL SKILLS

Frontend	:	HTML, CSS, JavaScript, React.js, Redux, Responsive Design, Performance Optimization
Backend	:	Node.js, Express.js, Socket.io, RESTful APIs, Google OAuth, Payment Gateway Integration, TensorFlow.js
Database	:	MongoDB, MySQL, PostgreSQL
DevOps	:	Docker, Nginx, Linux
Others	:	Machine Learning & AI, Git, GitHub, Problem Solving, Team Collaboration

EXPERIENCE

Web Developer Internship   Feb 2024 – Apr 2024
Systemic Altruism   *Remote – United States*

- Developed and maintained responsive, user-friendly websites, collaborating effectively with teams, troubleshoot and debug issues, optimized website performance, and staying up to date with industry standards.

PROJECTS

Machine Learning and AI Project   *ReactJS, NodeJS, MongoDB, Tensorflow.js, CSS, Git*   GitHub Code

- Built a web application using Node.js, MongoDB, and React that integrates machine learning models for predictions.
- Designed the system to use pre-trained models now, with future support for training on user data for personalized results.

Soclix – A modern social media app   *React, Redux, Typescript, NodeJs, Express, MongoDB, Socket.io*   Github Code

- A modern social media platform that provides a seamless way for users to connect and engage.
- Users can log into securely using Google authentication and manage their network by sending and accepting friend requests.
- They can share posts, like, and comment to stay connected with friends.
- The app also supports instant real-time messaging, ensuring smooth and interactive communication.

NatureLens an E-commerce Platform   *ReactJS, NodeJS, MongoDB, CSS, Rozorpay, Git*   GitHub Code

- E-commerce with Razorpay Integration : Users can browse and purchase nature photography securely via Razorpay.
- User Authentication : Provides secure login for personalized access to purchase history and account data.

EDUCATION

Diploma in Electrical Engineering   Durgapur, West Bengal, India
Durgapur Polytechnic College   *June 2017 – June 2019*
